

NICOLAS DANIELE

GAME PROGRAMMER

 n.daniele.3082@gmail.com |  +54 3543301479 |  [Portfolio](#) |  [LinkedIn](#)

SUMMARY

Game Programmer with 3 years of experience in Unreal Engine (UE4/UE5) and Unity. Specialized in gameplay systems, UI, AI, and multiplayer features. Skilled in optimization and teamwork. Passionate about building engaging, high-performance games.

SKILLS

- **Game Engines:** Unreal Engine (UE4/UE5), Unity
- **Programming:** C++, C#, Blueprints, Python, JavaScript
- **Frameworks & Libraries:** OpenGL, GLSL, SFML, STL, GAS (UE5), .NET
- **Networking & Backend:** AWS, Firebase, Photon/NGO
- **Tools:** Git, GitHub, Visual Studio, Rider, VS Code, Copilot
- **Concepts:** OOP, Design Patterns, SOLID, Clean Code, 3D Math, Data-Oriented Design, Multithreading, Networking (Client-Server, Replication)
- **Soft skills:** Problem solving, teamwork, efficient communication, proactivity, adaptability, self-management

EXPERIENCE

Professional

Unreal Engine Developer - Client from the US and Australia | 2024 - 2025

- Developed AlphaCity, an online multiplayer open-world game made in UE5
- Implemented backend systems in AWS, supporting +100 concurrent players
- Optimized rendering pipeline, boosting FPS from 10-15 to 40-50 on mid-range hardware

Game Programmer - Ravegan | 2022 - 2024

- Collaborated with remote multidisciplinary teams, ensuring smooth features integration
- Implemented boss AI using behavior trees, improving combat challenge
- Conducted code reviews, increasing maintainability and reducing bugs by 30%

Unity Developer - Runatics | 2022 - 2024

- Developed Project Roboc, a 2D platformer for Android built with Unity
- Collaborated on game design decisions, balancing technical feasibility with creative vision
- Designed player movement, physics, and adaptive UI for smooth mobile gameplay
- Implemented a scoreboard system with Firebase, allowing real-time updates

Personal projects | 2023 - Present

- Graphics Engine (C++/OpenGL): Custom rendering pipeline with shaders, lighting models and camera systems [\[GitHub\]](#)
- Physics Engine (C++): 2D/3D physics engine with collision detection, rigid body dynamics and impulses [\[GitHub\]](#)
- The Endless Descent (Unity): 2.5D dungeon crawler game made in Unity for mobile [\[GitHub\]](#)

EDUCATION & COURSES

- Master in Video Game Programming – TECH Global University | 2023–2024
- C++ Programming for Games – Image Campus | 2022–2023
- Video Game Development (Unity/Blender) – UTN Argentina | 2020–2021
- Technical Diploma in Simulations & Video Games – IES Argentina | 2015–2017

LANGUAGES

- Spanish: Native | English: B2 (IELTS) | German: A2
