

NICOLAS DANIELE

GAME PROGRAMMER

 n.daniele.3082@gmail.com |  +54 3543301479 |  [Portfolio](#) |  [LinkedIn](#)

SUMMARY

Game Programmer with 3+ years of experience developing gameplay systems, AI architectures, and multiplayer features using Unreal Engine 5 and Unity. Experienced delivering games for PC, mobile, and web platforms, both in international development teams and independently. Passionate about scalable gameplay systems and technical problem-solving.

SKILLS

- **Game Engines:** Unreal Engine, Unity, custom
- **Programming:** C++, C#, JavaScript, Blueprints
- **Frameworks & Libraries:** OpenGL, GLSL, SFML, STL, GAS (UE5), .NET
- **Networking & Backend:** AWS, Firebase, Photon/NGO
- **Development Tools:** Git, GitHub, Visual Studio, Rider, VS Code, CMake
- **Content Creation:** Blender, Adobe Photoshop, Adobe Illustrator
- **AI-assisted Engineering:** ChatGPT, Copilot, Claude Code, Gemini (debugging, prototyping, code generation, documentation)
- **Concepts:** OOP, Design Patterns, SOLID, Clean Code, 3D Math, Game Physics, Behavior Trees, FSM, Data-Oriented Design, Networking (Client-Server, Replication)
- **Soft skills:** Problem solving, teamwork, effective communication, proactivity, adaptability, self-management

EXPERIENCE

Professional

AI Game Programmer - Revise Entertainment | Present

- Developed enemy AI systems for a survival horror game in Unreal Engine 5
- Designed and implemented decision-making behaviors combining UE5 Behavior Trees with a custom Utility AI system
- Created modular AI architectures focused on scalability, responsiveness and gameplay immersion

Unreal Engine Developer - Clients from the US and Australia | 2024 - 2025

- Worked in the development of AlphaCity, an online multiplayer open-world game in Unreal Engine 5
- Implemented backend systems in AWS, supporting +100 concurrent players
- Optimized rendering pipeline, boosting FPS from 10-15 to 40-50 on mid-range hardware

Unity Developer - Runatics | 2022 - 2024

- Collaborated on game design decisions, balancing technical feasibility with creative vision
- Designed player movement, AI, and adaptive UI for smooth mobile gameplay
- Implemented a scoreboard system with Firebase, allowing real-time updates

Game Programmer - Ravegan | 2022 - 2024

- Collaborated with remote multidisciplinary teams, ensuring smooth features integration
- Developed gameplay systems and implemented boss AI using behavior trees, improving combat challenge
- Conducted code reviews, increasing maintainability and reducing bugs by 30%

Personal projects | 2025 - Present

- FoundryEngine (C++/OpenGL): Custom engine with physics simulation and graphic rendering [\[GitHub\]](#)
- The Endless Descent (Unity): 2.5D dungeon crawler game made in Unity for PC and mobile [\[GitHub\]](#)

EDUCATION & COURSES

- Master in Video Game Programming – TECH Global University | 2023–2024
- C++ Programming for Games – Image Campus | 2022–2023
- Video Game Development (Unity/Blender) – UTN Argentina | 2020–2021
- Technical Diploma in Simulations & Video Games – IES Argentina | 2015–2017

LANGUAGES

- Spanish: Native | English: B2 (IELTS) | German: A2 (learning)
